**Subject:** For Review: HEC Budget QFRs

Attached are a first draft of responses to QFRs following the Administrator's HEC budget hearing. Not sure if you've heard directly from OCIR on these, but my understanding is there's a rush to get these to OMB and then to the Hill (I think OCIR wanted them last Friday for their review). Not sure of the reason, so for now I vote for adding them to the queue of things to review, and we'll get them turned around as soon as we can.

Note there's one Loeb sack QFR that needs to be drafted here in the IO:

Loeb sack:

7. **OAR** Did you inform President Trump or White House staff of the unusually large number of small refinery exemptions EPA was granting and of the potential effects on the renewable fuel market of exempting additional gallons and facilities and the fact that these actions would not be well received by the agricultural community?
